INTERNATIONAL GEOGRAPHICAL UNION COLD REGION ENVIRONMENTS COMMISSION: ROLE IN THE ARCTIC SUSTAINABILITY SCIENCE

Tatiana Vlasova (*Institute of Geography, Russian Academy of Science, Russian Federation*)

tatiana.vlsv@gmail.com

This poster presentation is devoted to the past, present and future activities of the International Geographical Union Cold Region Environments Commission (IGU CRE), uniting both social and natural scientists, local and indigenous people, and many stakeholders interested in sustainable development, learning and socio-ecological systems resilience building in the Arctic. Special attention is given to the construction of efficient steps for the IGU CRE interactions with other Arctic scientific, educational, business and cultural national and international organizations and projects promoting and synthesizing knowledge about sustainability in the Arctic. Information and analysis will be given to the themes of the forthcoming IGU CRE sessions at the Regional IGU Conference in Moscow in August 2015 and in Beijing in August 2016. This poster will help to make closer links of IGU CRE with IASC and other and other interested parties.
